

Rapid CAPTURE

version 3

Introduction

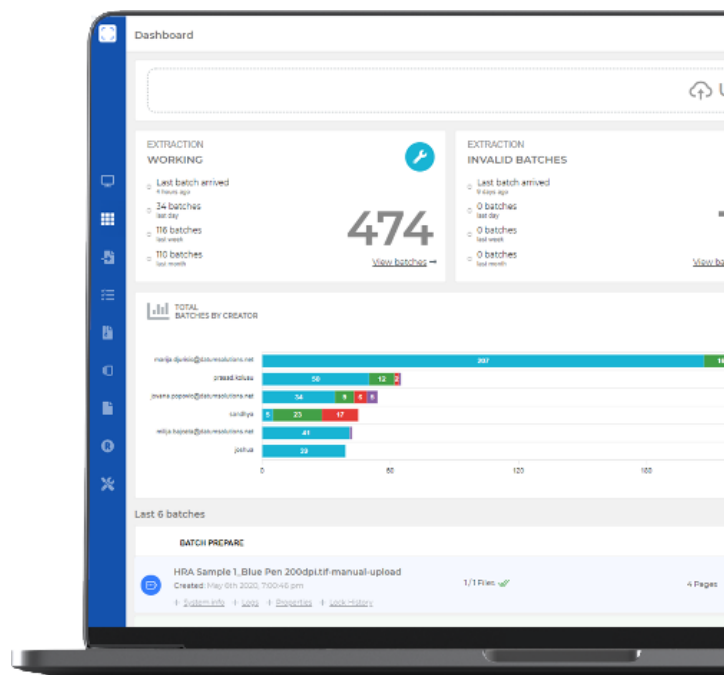

Today, large multinationals and Fortune 1000 companies have business operations spread across the globe with multiple regional offices generating documents on clients, internal departments, government policies and many more. Most of the information from these documents are in need to be captured in real time and processed accurately for a smooth-running organization. With advancement of technology there is constant increase of document and Contents generation. Organizations are seeking efficient solution which would optimize operation costs that can be effectively distributed for the growing demands of most business organizations.

RapidCAPTURE Version 3 by Datum Solutions offers the answer to this challenge . You can equip your organization with a solution for efficiency gain, found by leveraging document capture techniques that helps in managing the growing volume with efficient automation. Data extraction from captured content is key. By having all the valuable data extracted into a usable, actionable format, you can apply data insight related to business processes by reducing or eliminating characteristics such as double data entry and inaccurate keystrokes.

RapidCOGNITIVE is an add-on module to RapidCAPTURE that allows for even more power, flexibility and results. It increases document classification for non-standard and complex situations to deliver accurate classification results preventing documents from going into the wrong work processes. Challenging and complex circumstances where average data extraction tool face challenges, RapidCAPTURE can outperform efficiently . Characteristics such as multiple tables, checkboxes or multipage fields do not affect accuracy and extraction rates. In addition, the data normalizer uses machine learning and Artificial Intelligence in RapidCOGNITIVE for further improvement of results. Each of them has the purpose of driving better results and favorable outcome for your company.

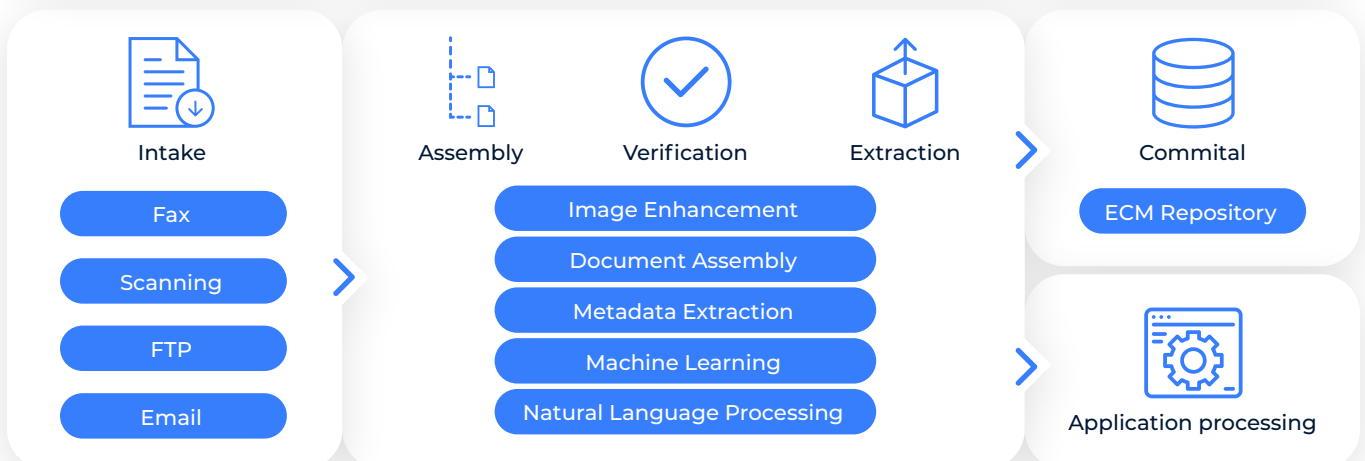

Why do you need RapidCAPTURE?

- **Organizations** intending to streamline operations by optimizing manual data entry steps for critical processes.
- Business leaders and managers who aim to **reduce labor costs and increase automation** while increasing operational and cost efficiency.
- **Businesses requiring** key information verified in real time for decision making, captured from multiple unstructured, handwritten, variable documents either in digital or paper format.
- **IT departments** attempting to leverage capture technologies within scheduled time and budget.
- **CIOs** looking to completely realize the value of their IT investment while meeting customer expectations.
- Day-to-day workload suffers due to flawed outdated technology which is unable to meet the demand of delivering present-day results. By introducing RapidCOGNITIVE to the technology refresh cycle, your **ROI will skyrocket**.
- Organizations aiming to **empower their line-of-business users** with low code solution configurations independent of IT support.

Benefits

- Role based security** Allows segregation of duties for workflow and sensitive information protection
- Integration with existing systems** Ability to integrate into existing ECM and non-ECM systems and sources for data lookups and validations
- Image processing** Image enhancement/clean-up
- Drag-and-drop** Drag-and-drop document assembly
- Intuitive Interface** Web-based user interface with intuitive design, ensuring quick and seamless adoption
- Document processing** Wide variety of document processing options such as straight-through, manual, exception handling and handwriting. RapidCAPTURE extends to other market leading capture solutions
- Adaptive core engine** Capable to leverage optimal extraction engine by choice, capitalizing on individual strengths as per process/use case needed
- Advanced Insights** Advanced and indepth auditing & reporting capabilities for better insights with intuitive user experience
- Multiple input channels** Easily manages various input channels, e.g. faxes, MFD's, scanners, FTP/shared folders, adhoc, user entered documents, emails
- RapidCOGNITIVE** Equipped with Ai and ML capabilities adds robust power, flexibility & better results as an add-on module to your existing capture solution
- Multiple Ingestion** Challenging and cumbersome situations that would normally require manual data entry can be overcome by adding RapidCOGNITIVE to RapidCAPTURE
- Cloud compatible** Rapid Capture V3 provides flexibility to choose right computing environment for your data
