

Fortune 500 commercial or government organizations today have many constituents they serve; clients, members, and citizens. The diversity of consumer, combined with the continued growth in data generated is phenomenal. This translates into organizations having to invest heavily into high cost storage

and retrieval solutions. Organizations are in need of solution which can save on the storage cost for the archived documents using compression techniques at the same time solution which can also maintain document integrity over period of time.

**Datum Solution's** answer to this challenge is RapidCOLD, enabling organizations to save on storage cost for archived documents using compression techniques while still maintaining the document's integrity for end user readability. It is a more efficient means of storing documents and still enables for the handling of the large amount of data required to maintain things such as customer bills, loan documents, accounting

reports, as well as large file structures like HL7, IHE and CCDR content types. It also enables your organization to sunset aging ECM systems and consolidate on newer P8-based architecture resulting in reduced operational costs. RapidCOLD delivers a COLD (Computer Output to Laser Disk) document by managing its data with the appropriate template for presentation.

## Who needs Datum Solutions RapidCOLD?

- Companies requiring COLD based solution but struggling with how to modernize them
- CIO's looking to reduce operational cost and leverage newer technologies
- Businesses wanting to modernize their aging FileNet Image Services (IS) based applications

- IT departments wanting to consolidate their ECM architecture for efficiency
- Organizations looking to reduce ECM architecture complexity while maintaining existing functionality
- Businesses requiring support for large complex objects alongside traditional content types

# Benefits of Datum Solutions RapidCOLD

## Full-featured

Provides all the features of FileNet IS COLD and more

Allows for the sun setting of aging ECM technology

- Retirement of old Image Services (IS) servers
- Lower operational costs
- Eliminates the need to find IS-skilled resources

Sun setting of aging ECM technology

## Reduce Storage costs

Reduces storage costs

- Compression of data
- Use of document templates
- Efficient use of logos/images

Leverages investment in IBM Case Foundations licenses

- Puts to use licenses on the shelf
- Makes P8 architecture COLD

Leverage investments

## Modern User Interface

Taking advantage of modern User Interface

- May use IBM Content Navigator for COLD-based applications
