Overview / Introduction

In the Healthcare sector, every small detail can make difference of life and death, and efficiency must be optimized in every respect. In the healthcare sector, medical personnel are constantly confronted with new challenges under high time pressure. Patients are the first priority.

RapidMedical's Intelligent Data Capture system in healthcare automates the process of extracting and identifying essential medical data and further process it for tasks relating to that data with ease.

Rapid Medical is an advanced technology that automates and processes critical information from Medical Documents, paper and electronic documents to instantly unlock their value

RapidMEDICAL bringing change in Health Care

Intelligent capture empowers healthcare organizations to take control of content wherever human touch points threaten to slow processes and create errors. It maximizes information processing rustling in faster decision making and critical Data management.

Doing so, its highly scalable, secure with efficient reporting and analytics can adapt into any critical situation causing a fundamental shift in the way businesses ingest and use their content.

Challenges for HealthCare

Time Consuming and Costly

Despite Healthcare sectors huge complexity, they are constantly challenged to do more with less Manually Documenting, capturing and maintaining information's increases the process cycle, slowing down decision making. Medical staff spending time and energy on manual tasks and tedious routines like reading and keying in invoices, orders, remittances and other documents every day, reduces efficiency, while automating the tasks is missed out

High Resource involvement and Error prone:

On an average Day, a HeathCare unit needs to capture and process information coming though digital or in paper format. To make critical decision making and analyzing a patient's every possible detail from medical history to current symptoms are documented to verify key information. Needless to say, healthcare sector is high labor dependent and error prone due to high documentation and repetitive data processing.

Lack of Inteligent Automation

Automation Allows Organizations to smoothen operation and manage Finances efficiently. Without Intelligent Automation every document needs to manually be processed for necessary information, classified accordingly and recorded for further use, needless to say adding huge task every time.
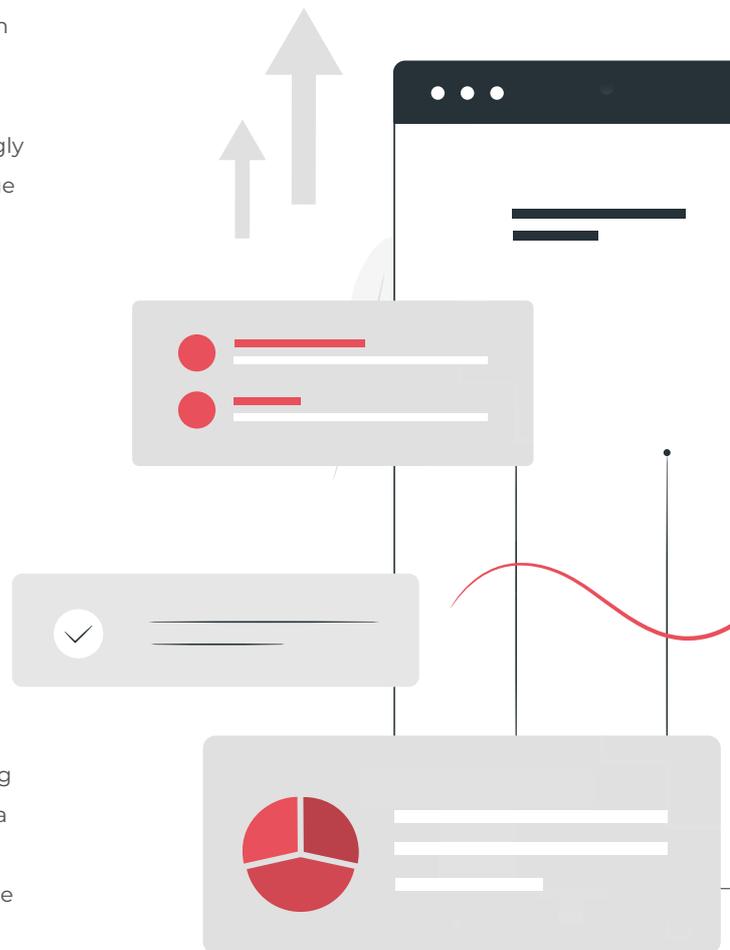

Security and Data Breach

At current times, securing data is most crucial for any healthcare organization. A medical data breach is a data breach of health information, which could include either the personal health information of any individual's electronic health record or medical billing information, or personal details.

High setup cost and Complex content services

Health care organization face major challenges in finding the right solution provider when it comes to solving Data capturing and processing troubles. Most solution take a long setup time and require special IT expertise to handle them.

RapidMEDICAL solution for HealthCare

Better Safety and Accuracy

In a HealthCare sector where the consequences due to human error can be fatal, RapidMedical has erased the whole requirement of recording data manually by automating the process through Intelligent Capture. The power to capture, analyze and verify data from complex documents in structured or unstructured formats and further process it for Business use sets RapidMedical as a must have for a Healthcare Industry. It saves from Data loss in the process and further its state of Art security system saves any form of Data Breach.

Valuable insights through AI

Finding necessary insights and Links in medical claims is one of key factor that helps in taking crucial decisions fast. RapidMedical-CLAIMS's smart search artificial intelligence capabilities bring all relevant documents together and recommends solutions. Automating this previously manual and time intensive processes, provides deep insight and fast decision-making power.

Capture, Analyze ,Process anything – even difficult Handwriting

In Healthcare sector necessary data comes in any format (from Handwritten reports to emails) holding key information and Data that needs to be captured rapidly in context. RapidMedical is able to ingest documents in multiple document formats - Structured, Unstructured & Handwritten in a single stream. Smart capture using machine learning and Natural Language Processing capabilities reads and segregates each data for further Business use. Hence saving all the manual work.

Automation & Accuracy saving time for HeathCare

RapidMedical's Intelligent Capture automates the process of documents and Data processing from any medical records with high Accuracy. Automation and the real-time data allow medical staff to maintain a closer relationship with their patients and to take care of the work that corresponds to their qualifications. RapidMedical reduce manual tasks resulting as a key driver for productivity that provides employees for more decision work.

Quick setup and easy usability

In Insurance industry for Medical Claims a quick and functional system is first and foremost priority. RapidMEDICAL-CLAIMS understands the importance of quick Deployable and fully functional system. It is fast deployable which easily integrates with your business process and can be handled by your business team with bare minimum involvement of your IT team.
