

RapidMEDICAL - CLAIMS

Overview / Introduction

In the Healthcare sector, every small detail needs to be captured and efficiency must be optimized in every respect. Handling Patients and Medical Claims in parallel becomes extremely complicated and important task.

Medical claims Processing is as complex as healthcare these days. With fast-changing medical solutions, maintaining records and processing Medical Claims manually is highly error prone and inefficient

Medical Insurance companies are searching for solutions to reduce the inaccuracy and inefficiency of manually processing claims and capturing Data. Datum's RapidMEDICAL-CLAIMS solves all the shortcomings through processing automation and drastically decrease loss adjustment expense (LAE).

The Better way of Processing Medical-Claims

Datum's RapidMEDICAL-CLAIM solutions helps Insurance institutions create and deploy automated, agile claims management processes for full-proof claims processing. A customized medical claims management solution that seamlessly integrates multiple complex systems, platforms, as well as manual processes to automate medical claim processing workflow throughout the claims life cycle.

RapidMEDICAL-CLAIMS empowers Insurance organizations to take control of Business Process Automation specialized to capture information found on paper claim files and digital medical claims wherever human touch points threaten to slow processes, create errors and proves expensive. It ideally automates and support all standard of medical claim forms like HCFA/CMS-1500 along with any relevant attachments. Through AI supported precise data extraction technology it ensures peak accuracy and accountability in reviewing data by automated validation rules set by businesses with a minimum of human involvement

Challenges for Medical CLAIMS PROCESSING

Time Consuming and Costly

Despite Healthcare sectors huge complexity, they are constantly challenged to do more with less. Manually Documenting, capturing and maintaining information's increases the process cycle, slowing down decision making. Medical staff spending time and energy on manual tasks and tedious routines like reading and keying in invoices, orders, remittances and other documents every day, reduces efficiency, while automating the tasks is missed out.

High Resource involvement and Error prone:

On an average Day, a HealthCare unit needs to capture and process information coming through digital or in paper format. To make critical decision making and analyzing a patient's every possible detail from medical history to current symptoms are documented to verify key information. Needless to say, healthcare sector is high labor dependent and error prone due to high documentation and repetitive data processing.

Lack of Intelligent Automation

Automation Allows Organizations to smoothen operation and manage Finances efficiently. Without Intelligent Automation every document needs to manually be processed for necessary information, classified accordingly and recorded for further use, needless to say adding huge task every time.

Security and Data Breach

At current times, securing data is most crucial for any healthcare organization. A medical data breach is a data breach of health information, which could include either the personal health information of any individual's electronic health record or medical billing information, or personal details.

High setup cost and Complex content services

Health care organization face major challenges in finding the right solution provider when it comes to solving Data capturing and processing troubles. Most solution take a long setup time and require special IT expertise to handle them.

Solution from Datum's RapidMEDICAL-CLAIMS

Increased Reliability and Accuracy

In Medical Insurance industry every claim needs to process accurately and fast through proper analyzing and documentation. RapidMEDICAL-CLAIMS automates the entire process and ensures that a business performs all the necessary tasks in the proper sequence and on time

Valuable insights through AI

Finding necessary insights and Links in medical claims is one of key factor that helps in taking crucial decisions fast. RapidMedical-CLAIMS's smart search artificial intelligence capabilities bring all relevant documents together and recommends solutions. Automating this previously manual and time intensive processes, provides deep insight and fast decision-making power.

Reduced Human Resource Costs

Datum's RapidMEDICAL CLAIM's BPA improved medical Claims processing and reduced human intervention and saved operational cost overtime. It lowered headcount while strengthening their operational output and maintaining, or even improving, cycle times

Intelligent AI powered solution predicting Medical Claims Characteristics

AI powered Rapid MEDICAL-CLAIM's can detect unusual indications in Claims, such as the likelihood of fraud, total loss, or litigation, to speed up its downstream handling. It can estimate a Claim's value in real time based on document submitted, using the latest advances in AI and picture recognition.

Medical - Claims Segmentation

AI algorithms can help segment various medical claims submitted by factual and predicted claims characteristics. Based on this segmentation, claims can be assigned to specific downstream handling processes.

Quick setup and easy usability

In Insurance industry for Medical Claims a quick and functional system is first and foremost priority. RapidMEDICAL-CLAIMS understands the importance of quick Deployable and fully functional system. It is fast deployable which easily integrates with your business process and can be handled by your business team with bare minimum involvement of your IT team.
